Re: Updated information from Steve Sorenson, KSC Rocks, S/041/027 (UTU-71640), Sevier County, Utah

Dear Mr. Jackson:

Thank you for forwarding the updated information you received from Steve Sorenson for their KSC Rocks project located in Sevier County, and your response letter received on August 10<sup>th</sup> and 16<sup>th</sup> respectively. This material has been reviewed and meets Division requirements.

We recently started requiring that the operator's mark their permitted boundary with metal t-posts or other markers of the same effectiveness. The markers must be appropriately spaced so that the next marker in either direction is clearly visible with the naked eye. As the BLM is the lead agency for this project, and because this project is being expanded, please inform the operator of this requirement. Please inform Mr. Sorenson that he cannot expand beyond the permitted five acre limitation of his small mining notice, without first submitting and receiving written approval for a large mining plan from this office. With our present workload, large mining notices take from six to nine months or longer.

Thank you for keeping us informed of the mining projects in your area.

Sincerely,

Lynn Kunzler  
Senior Reclamation Specialist
